

# Personal CNC Mills

## Prototyping - Product Design - R&D - Engineering

Shown here is an articulated humanoid robot leg, built by researchers at the Drexel Autonomous System Lab (DASL) with a Tormach PCNC 1100 milling machine. DASL researcher Roy Gross estimates that somewhere between 300 and 400 components for "HUBO+" have been machined on their PCNC 1100. To learn more about this project, visit [www.tormach.com/servo](http://www.tormach.com/servo).
